Education

Universitas Muhammadiyah Sumatera Utara

Bachelor of Engineering in Computer Science with a 3.92/4.0 GPA

Best Graduate, Information Systems Study Program

Outstanding Graduate Award

Medan, Sumatera Utara

Sep 2022 - Jun 2026

Universitas Muhammadiyah Malang

Student Exchange

Malang, Jawa Timur

Feb 2024 - Jul 2024

Skills

- **Programming Language:** Python, C++, PHP, Javascript, Flutter, Laravel, Codeigniter, React-js
- **Machine Learning:** PyTorch, Tensorflow, Tensor-RT, Scikit-Learn, OpenCV
- **DevOps:** Git, AWS, Apache, Ubuntu
- **Data:** MySQL, PostgreSQL, MongoDB, Firebase
- **AI Related Course Taken:** Advanced Machine Vision, Topics in Digital Image Processing, Speech Processing, Natural Language Processing, Advanced Deep Learning

Experiences

Research and Teaching Assistant (Part-time)

Computer Science Faculty

Medan, Sumatera Utara

Okt 2025 – Mei 2026

- Assisted lecturers in research and community service projects involving technology implementation and data analysis.
- Worked on IoT-based plant monitoring systems with topics including temperature monitoring, soil moisture monitoring, nutrient level monitoring, and real-time environmental monitoring.
- Worked on Machine Learning and Computer Vision research projects with topics including pest detection, pest classification, image processing, and digital image analysis.
- **Stack used:** Arduino/ESP32, OpenCV, Python, C++, Git, JavaScript, Firebase

Programmer (Contract)

BKPSDM Kota Binjai

Binjai, Sumatera Utara

Feb 2026 – Mei 2026

- Analyzed and improved BKPSDM Kota Binjai web applications to enhance system functionality and user experience.
- Developed and maintained features in the SIMPEG application, including the PLT module to support automated TPP calculations based on government regulations.
- Processed and validated employee data to generate accurate reports and support data-driven decision making for government agencies.
- Assisted in performance data management and reporting systems used for monthly employee incentive calculations.

IT Support (Intern)

Pt Perkebunan Nusantara (PTPN IV)

Medan, Sumatera Utara

Feb 2025 – Apr 2025

- Provided technical support for 50+ organizational devices, including PC deployment, hardware troubleshooting, software installation, and system maintenance to ensure smooth daily operations.
- Installed, configured, and maintained office equipment such as computers, printers, scanners, Microsoft Office, and network devices across multiple departments.
- Diagnosed and resolved hardware, software, and network connectivity issues, including LAN configuration, peripheral integration, and workstation optimization to improve employee productivity.
- Assisted in IT infrastructure management through PC assembly, device upgrades, preventive maintenance, and operational support for meetings and corporate events.

Software Engineer (MSIB - Intern)

Pt Telekomunikasi seluler (Telkomsel)

Medan, Sumatera Utara

Sept 2024 – Des 2024

- Designed and developed a dynamic sales dashboard and data analytics platform that supported data-driven decision-making through interactive visualizations, improving data accessibility and usability by more than 50%.
- Optimized database structures and query performance to manage over 150,000 sales records, resulting in a 15% improvement in data retrieval speed and enabling more efficient data analysis.
- Developed ETL processes and large-scale sales data comparison tools, reducing data upload time by 20% and accelerating analysis processes by up to 45%.
- **Stack used:** CodeIgniter, PHP, JavaScript, PostgreSQL, Tailwind CSS, Git.

Certifications

- Best Graduate, Information Systems Study Program (2026)
- Kampus Merdeka - PMM (Student Exchange) & MSIB (Internship) (2025)
- ASEAN Data Science Explorers Training (2023)

Projects

Simantau (Researcher)

- Developed SIMANTAU, an IoT-based plant monitoring system integrating ESP32 sensors and a web dashboard for real-time monitoring.
- **Stack used:** CodeIgniter, PHP, Javascript, Bootstrap, Firebase

Pedicare (Project Manager)

- Led a team in designing PediCare, a digital healthcare platform for virtual consultations, medicine recommendations, and healthcare service management
- **Stack used:** Flutter, Firebase, Git, Figma

Expert system (Software Engineer)

- Designed and developed 3 rule-based expert systems for diagnosing diseases in coffee plants, guava plants, and pediatric worm infections based on user-input symptoms
- **Stack used:** Laravel, Bootstrap, AdminLTE, MySQL, Apache

Natural Language Processing (Full-Stack Engineer)

- As a freelancer, developed 4 web-based applications using Natural Language Processing (NLP)
- **Stack used:** Python, Streamlit / Flask, Pandas, Scikit-learn, NLTK

Gis-based Decision Support System (Full-Stack Engineer)

- As a freelancer, developed 2 GIS systems for regional data collection for North Labuhan Batu Utara and Kampung Masjid using mapping and location data
- **Stack used:** PHP, CodeIgniter, JavaScript, Leaflet.js, MySQL, GIS, Bootstrap, Git.

Mobile App (Software Engineer)

- Freelance developer of 5 mobile applications for information systems and user services
- **Stack used:** Flutter, Firebase, Git

Desa-bengkel.com (Project Manager)

- Development of Bengkel Village website as a web-based information and public service platform
- **Stack used:** CodeIgniter, PHP, Javascript, Tailwind, PostgreSQL

Household (Software Engineer)

- Developed and managed Household project data as part of the MSIB program at Telkomsel to support customer data analysis and management
- **Stack used:** CodeIgniter, PHP, Javascript, Tailwind, PostgreSQL

Languages

- Indonesia: Native
- English: Intermediate
